City Theatrical Launches Multiverse Studio Wireless DMX Products For Film & Video

City Theatrical's Multiverse® wireless DMX/RDM technology is now available for film & video projects with a new line of **Multiverse Studio** products, including the **Multiverse Studio Receiver**, **Multiverse Studio Kit**, and **Multiverse Studio Add On Kit**, now available in dual band 900MHz/2.4GHz functionality for North America, and 2.4GHz band usage worldwide.

As the newest hardware building block to the Multiverse product line, the **Multiverse Studio Receiver** brings the advanced features of the Multiverse wireless DMX/RDM system to the film and video world with fast setup and reliability. It contains a long-life lithium-ion polymer battery giving 20 hours of use, and its full four button user interface with a backlit LED display makes setup easy and gives feedback on system performance. Each Multiverse Studio Receiver includes a DMX corded connector, which allows the external antenna to hang below the lighting fixture, giving improved data fidelity.

Two Multiverse Studio Receiver models are now available and shipping through City Theatrical dealers worldwide. The Multiverse Studio Receiver 900MHz/2.4GHz (P/N 5904) has two built-in radios, 2.4GHz (for worldwide use) and 900MHz (for use in the Americas only), which allow the user to select which single universe to receive, and which radio band to use via the Multiverse SHoW ID. The Multiverse Studio Receiver 2.4GHz (P/N 5905) can be used worldwide on the 2.4GHz band. Learn more at: citytheatrical.com/Products/multiverse-studio-receiver

Ideal as a turnkey wireless DMX solution for film & video projects of varying sizes, the **Multiverse Studio Kit** provides all the tools lighting technicians need to quickly plan, setup, and operate wireless DMX/RDM on set – all within an easy to use kit with contactless charging.

Each Multiverse Studio Kit includes: six Multiverse Studio Receivers, one [Multiverse Transmitter](#) with hanging bracket and clamp (for multi universe broadcasts), one [Multiverse Node](#) with hanging bracket and clamp (for single universe broadcasts), one [DMXcat® Multi-Function Test Tool](#) (to turn on and troubleshoot any lighting fixture on set), one [RadioScan™ Spectrum Analyzer](#) (for broadcast planning), and various accessories to keep your equipment organized, mounted, and charged. Learn more at: citytheatrical.com/Products/multiverse-studio-kit

To complement the Multiverse Studio Kit, the **Multiverse Studio Add On Kit** was developed to provide an easy way for film & video professionals to scale up wireless DMX projects. This kit features six Multiverse Studio Receivers in a contactless charging case. Individual chargers and
