

CITY THEATRICAL

NEW YORK • LONDON

August 25, 2022
For Immediate Release

City Theatrical at PLASA Show 2023

City Theatrical will be demonstrating new technology on **Stand A49** at [PLASA Show 2023](#) at the Olympia Exhibition Centre in London from 3-5 September 2023. Please join us to experience live product demonstrations of City Theatrical products, including [Moving Light Assistant™](#) software, [Pathway Connectivity](#) solutions, the [Multiverse® wireless DMX/RDM](#) system, QolorFLEX Dimmers, LED Tapes, and Accessories, including [QolorFLEX® 5-in-1 HiQ High CRI LED Tape](#) and [QolorFLEX NuNeon®, Tunable White HiQ High CRI](#) linear lighting, to name a few. There will also be a [DMXcat® Multi Function Test Tool](#) giveaway, available for three lucky event participants, on the White Light stand this year.

[Free registration](#) for the event is available through 31 August 2023.

Moving Light Assistant software will be available for demonstration with its founder, Andrew Voller, on the City Theatrical stand at PLASA London. Andrew Voller, who is the software's developer, as well as a lighting designer and end user, will be available to take questions and share insights.

Pathway Connectivity solutions are available to the European market through City Theatrical. Nominated previously for the PLASA Awards for Innovation, the [PWPP Rack Mount DMX Gateway](#) (also known as Pathport Octo DMX/RDM gateway) will be available for demo on the City Theatrical stand at PLASA Show 2023. This device allows users to gain secure access to monitor and configure your network from anywhere in the world using a PC or mobile device. Pathway Connectivity solutions extend the functionality of DMX control, and have created the next generation of lighting networks with open system products that harness the power and convenience of Ethernet to create spectacular visual experiences for live audiences worldwide. Other Pathway solutions available for demonstration at this year's PLASA Show include the [PWPP Wall Mount DMX Gateway, 2-Port](#) (also known as Pathport C-Series), [PWPP Wall Mount DMX Gateway, 1-Port](#) (also known as Pathport Uno™), [PWGW Vignette DIN Mount Gateways](#) (also known as Vignette), and more.

Also available for demonstration, City Theatrical's [Multiverse Transmitter 2.4GHz](#) has the ability to broadcast up to 10 universes of DMX data on the 2.4GHz band while using less radio energy than other single universe wireless DMX transmitters. Multiverse users can plan their wireless DMX broadcast using a [RadioScan® Spectrum Analyser](#) as a frequency scanner, and set universes on each receiver from their smartphones using City Theatrical's DMXcat app, which allows them to change their wireless DMX/RDM setup from anywhere on set, whether it is a lighting fixture with onboard Multiverse technology, a lighting fixture receiving its data from a

Multiverse Node, or any wired fixture downstream of those devices. The Multiverse Transmitter is Wi-Fi enabled, allowing for communication and control from tablet-based Wi-Fi lighting controllers.

City Theatrical's [Multiverse Studio Kit](#) is an all-in-one, battery powered wireless DMX/RDM solution that offers reliable wireless DMX functionality with greater usability, making wireless DMX easier to install and use for film and video projects, as well as live events. Multiverse Studio Kit features contactless charging for its six [Multiverse Studio Receivers](#), which each contain a long-life lithium-ion polymer battery giving 20 hours of use. Each Multiverse Studio Receiver features a full four button user interface with a backlit LED display, which makes setup easy and gives feedback on system performance, as well as a DMX corded connector, which allows the external antenna to hang below the lighting fixture for improved data fidelity.

QolorFLEX Dimmers include a family of miniature low voltage wireless dimmers with Multiverse wireless DMX/RDM connectivity. [QolorFLEX 2x2.5A Multiverse Dimmers](#) are small, low voltage, constant voltage, two-output dimmers designed to be mounted in small spaces such as props, costumes, wands, and candles. [QolorFLEX 5x2.5A Multiverse Dimmers](#) are slightly larger and can be controlled wirelessly using City Theatrical's Multiverse or SHoW DMX Neo wireless DMX/RDM technology, or with wired DMX. These dimmers provide 20-bit PWM resolution and six DMX personality options, including: 8-bit (5ch), 16-bit (10ch), 8-bit Tunable White Single (2ch), 16-bit Tunable White Single (4ch), 8-bit Tunable White (4ch), and 16-bit Tunable White (8ch), for extremely smooth dimming at the low end of the dimming curve.

The [QolorFLEX LED Tape](#) line includes 45+ high quality tape options that help lighting designers put light in places that were once thought impossible and create lighting fixtures and effects in a new and inexpensive way. City Theatrical's [QolorFLEX 5-in-1 LED Tapes](#) are offered in recently launched HiQ High CRI and RGB plus Amber plus Cool White colours. This LED tape has a high output brightness and all LEDs are identical to create an even illumination. New QolorFLEX 5-in-1 HiQ High CRI LED Tape (P/N 5050-24-RGBH27006500-60-5-20-1) has a Colour Rendering Index (CRI) of 95 and is 25% brighter than other 5-in-1 LED tapes, making it an ideal high CRI LED tape for the camera needs of film and video projects, while providing lighting professionals with ultimate colour control.

For designers looking for an LED replacement for traditional neon lighting, City Theatrical's [QolorFLEX NuNeon](#) is a sealed LED linear product that is extremely flexible, incredibly bright, and safe for indoor or outdoor use. QolorFLEX NuNeon offers minimum bending radius in the horizontal plane of 12.7mm for ideal precision for signage, and a 152.4mm minimum bending radius along the vertical axis for smooth curves around 3D objects. New QolorFLEX NuNeon, Tunable White HiQ High CRI (P/N N914-H27006500-5) offers exceptional on-camera colour rendition with a Colour Rendering Index (CRI) greater than 94, allowing lighting professionals to meet the needs of high-quality film and video lighting.
